

Railway tyre reconditioning and reprofiling process

Trams and locomotives

Ghibellina is able to carry out wheel dressing and reprofiling on **any type of railway tyre**, both for trams and locomotives.

All machining operations are carried out in compliance with the **standards** in force in Italy and Europe.

The **steps** involved in the implementation process are as follows:

- 1. Removing safety rings**
- 2. Scaling of tyres**
- 3. Checking and grinding wheel centre**
- 4. Internal tyre turning**
- 5. Calibrating tyres and mounting safety rings**
- 6. External tyre profiling according to drawing**
- 7. Wheelset testing**

1. Removing safety rings

2. Scaling of tyres

3. Checking and grinding wheel centre

4. Internal tyre turning

5. Calibrating tyres and mounting safety rings

6. External tyre profiling according to drawing

7. Wheelset testing
